During the event FUNDAR, a civil society organization, submitted a statement on behalf of several civil society organizations from Latin America and the Caribbean. In that statement they express their views on the second draft of the proposed Environmental and Social Framework. The statement can be found on the World Bank’s dedicated consultation website (http://consultations.worldbank.org/consultation/review-and-update-world-bank-safeguard-policies).

Participants highlighted that the proposed ESF should include references to international human rights frameworks.

| ESP/ESS1 | Non-discrimination and vulnerable groups | 2. Explicit listing of specific vulnerable groups by type/name (age, gender, ethnicity, religion, physical, mental or other disability, social, civic or health status, sexual orientation, gender identity, economic disadvantages or indigenous status, and/or dependence on unique natural resources)  
3. Specific aspects of the non-discrimination principle in complex social and political contexts, including where recognition of certain groups is not in accordance with national law |  
Use of Borrower’s Environmental and Social Framework | 4. Role of Borrower frameworks in the management and assessment of environmental and social (E&S) risks and impacts where these will allow projects to achieve objectives materially consistent with Environmental and Social Standards (ESSs)  
5. Approach for making decision on the use of Borrower frameworks, including the methodology for assessing where frameworks will allow projects to achieve objectives materially consistent with the ESSs, and the exercise of Bank discretion  
6. Role of Borrower frameworks in high and substantial risk projects |  
Co-financing/common approach | 7. Arrangements on E&S standards in co-financing situations where the co-financier’s standards are different from those of the Bank |  
Adaptive risk management | 8. Approach to monitoring E&S compliance and changes to the project during implementation |  
Risk classification | 9. Approach to determining and reviewing the risk level of a project |  
ESS1 | Assessment and management of environmental and | 10. Assessment and nature of cumulative and indirect impacts to be taken into account  
11. Treatment of cumulative and indirect impacts when |
| ESS2 | Labor and working conditions | 15. Definition and necessity of and requirements for managing labor employed by certain third parties (brokers, agents and intermediaries)  
16. Application and implementation impacts of certain labor requirements to contractors, community and voluntary labor and primary suppliers  
17. Constraints in making grievance mechanisms available to all project workers  
18. Referencing national law in the objective of supporting freedom of association and collective bargaining  
19. Operationalization of an alternative mechanism relating to freedom of association and collective bargaining where national law does not recognize such rights  
20. Issues in operationalizing the Occupational Health and Safety (OHS) provisions/standards |
| ESS3 | Climate change and GHG emissions | 21. The relation between provisions on climate change in the ESF and broader climate change commitments, specifically UNFCCC  
22. Proposed approaches to measuring and monitoring greenhouse gas (GHG) emissions in Bank projects and implications thereof, in line with the proposed standard, including determining scope, threshold, |
| ESS5 | Land acquisition and involuntary resettlement | 24. Treatment and rights of informal occupants and approach to forced evictions in situations unrelated to land acquisitions  
25. Interpretation of the concept of resettlement as a “development opportunity” in different project circumstances |
|---|---|---|
| ESS6 | Biodiversity | 26. Operationalization of the provisions on primary suppliers and ecosystem services, especially in situation with low capacity  
27. Role of national law with regard to protecting and conserving natural and critical habitats  
28. Criteria for biodiversity offsets, including consideration of project benefits  
29. Definition and application of net gains for biodiversity |
| ESS7 | Indigenous Peoples | 30. Implementation of the Indigenous Peoples standard in complex political and cultural contexts  
31. Implementation of ESS7 in countries where the constitution does not acknowledge Indigenous Peoples or only recognizes certain groups as indigenous  
32. Possible approaches to reflect alternative terminologies used in different countries to describe Indigenous Peoples  
33. Circumstances (e.g. criteria and timing) in which a waiver may be considered and the information to be provided to the Board to inform its decision  
34. Criteria for establishing and implementation of Free, Prior and Informed Consent (FPIC)  
35. Comparison of proposed FPIC with existing requirements on consultation  
36. Application of FPIC to impacts on Indigenous People |

- Participants stated that current projects do not properly assess impacts on biodiversity.
- Participants stated that the ESF should have clearer language regarding circumstances where critical habitats are part of lands occupied by indigenous peoples.
- Participants supported the inclusion of FPIC in the proposed standard.
- Participants expressed concern that, even if there may be no consent (FPIC) given by Indigenous Peoples to a given project, the Indigenous Peoples’ component may be dropped but the overall project may go ahead.
- Participants stated that the proposed ESF should include references to ILO Convention 169, as well as the United Nations Declaration on the Rights of Indigenous Peoples.
### Peoples’ cultural heritage

- Participants considered that there is a lack of diversity in the people that are consulted in Mexico. They stated that consultations are sometimes poorly targeted, citing examples where only landowners are consulted and consequently only adult men provide feedback on a project. Participants mentioned that the World Bank has to improve its consultations of marginalized groups.

- Participants highlighted that while the government’s framework for consultations is satisfactory, its implementation is not. They stated that consultations need to be undertaken during project design because they often start at implementation, and only after large government investments have been made. This leaves little to no room for project modifications.

- Participants mentioned that in many large infrastructure projects there is no direct benefit for the populations where the infrastructure is being built.

- Participants expressed that to avoid biases, consultations required an ombudsman.

| Feasibility and resources for implementation | 45. Implementation and resource implications for Borrowers, taking into account factors such as the expanded scope of the proposed ESF (e.g., labor standard), different Borrower capacities and adaptive management approach.  
46. Mitigation of additional burden and cost and options for improving implementation efficiency while maintaining effectiveness. |
| Client capacity building and implementation support | 47. Funding for client capacity building  
48. Approaches and areas of focus  
49. Approach to implementing the ESF in situations with capacity constraints, e.g., FCS, small states and emergency situations. |
| Disclosure | 50. Timing of the preparation and disclosure of specific environmental and social impact assessment documents (related to ESS1 and ESS10). |
| Implementation of the | 51. Bank internal capacity building, resourcing, and |

- Participants underscored the importance of the World Bank’s transparency and access to information protocols and stated that project documents need to be disclosed at an early stage in the project-cycle.

- Participants highlighted that there is a large discrepancy between the Mexican legal and regulatory framework, which is good, and its implementation. They stated that while the Mexican government has the capacity to properly implement its Framework, it often does not do so due to corruption. Participants stated that the World Bank should help the government overcome that challenge.

- Participants stated that the World Bank should help improve the government’s capacity guarantee equal benefit-sharing, and ensure that it happens in a transparent manner.

- Participants inquired how the Bank would ensure
behavioral change in order to successfully implement the ESF
52. Ways of reaching mutual understanding between Borrower and Bank on issues of difficult interpretation

that its staff have the capacity to implement of the proposed Framework.

Other issues

- Participants mentioned that language that denotes flexibility in the proposed Framework (i.e., “as needed”, “as appropriate”, “acceptable to the Bank”, etc.) lowers standards. Participants stated that stricter language on requirements and timelines was needed, especially for consultations and the public disclosure of documents.

- Participants stated that there is a lack of proper environmental and social analysis for DPLs.

- Participants manifested concern that case-studies were only discussed with government officials and not with civil society organizations (CSOs).

- Participants asked how the comments of CSO would be taken into account and if there were means of following up with the final draft of the proposed ESF.

- Participants expressed concern that invitations were not sent out in a timely manner, or to sufficient CSOs.
