Outline

1. **Country Partnership Framework (CPF) FY2022-26 Foundations**
   - Country Priorities
   - Systematic Country Diagnostic (SCD) Update Findings
   - Completion and Learning Review (CLR) and Lessons Learned

2. **Overview of World Bank Group (WBG) Lesotho CPF FY2022-26**
   - Structure
   - What will we do differently
   - Current IDA Portfolio
How does the WBG engage in a country?

The WBG's approach to country engagement includes four distinct steps:

**Systemic Country Diagnostic**
- The SCD is a diagnostic by the WBG in consultation with national authorities, the private sector, and other stakeholders, as appropriate to develop CPF objectives together.

**Country Partnership Framework**
- The CPF is the central tool for the WBG and the country for guiding the WBG's country programs and gauging their effectiveness. It builds on the country's development program and articulates a results-based engagement.

**Performance & Learning Review**
- Every 2 years during the implementation of a CPF, or at midterm, a Performance and Learning Review (PLR) is prepared to summarize progress in implementing the CPF program.

**Completion & Learning Review**
- At the end of every CPF period a CLR assesses the CPF program performance using the results framework set out in the most recent PLR.
Country Partnership Framework – Foundations

The CPF is founded on:

1. **Three key elements:**
   - Government’s development priorities (e.g. NSDP2)
   - Assessment of key development challenges and opportunities to progress towards twin goals (SCD)
   - Self-assessment of the WBG’s comparative advantage

2. **Lessons learned.** what has and has not worked well in the WBG’s experience over the past five years (CLR).

3. **Existing portfolio and new demands to deliver results during the CPF period.**
Government Program and Medium-Term Strategy
Government has recently conducted the 2021 Mid-Term Review (MTR) of the NSDP II 2018/19-22/23

**MTR: NSDP II** with specific focus on ‘job creation and inclusive growth’ remains relevant, but it is too ambitious, with too many interventions, and is not in line with the limited resources (financial and non-financial). COVID-19 has created additional pressure.

### 2018 NSDP II

**Objective**
- Transform Lesotho from a consumer-based economy to a private sector and export-driven economy and pursuing people-centered development.

**Key Priority Areas (KPA)**
- **KPA I.** Enhancing Inclusive and Sustainable Economic Growth and Private Sector Job Creation
- **KPA II.** Strengthening Human Capital
- **KPA III.** Building Enabling Infrastructure
- **KPA IV.** Strengthening National Governance and Accountability Systems
- **Cross-Cutting Topics.** Environment and Climate Change, Youth and Gender

### Adjusted Priorities

- **KPI I.** Inclusive, sustainable growth, private sector job creation, especially in agriculture, manufacturing, mining and tourism.
- **KPA IV.** Strengthening National Governance and Accountability Systems
- **KPA II and III.** Strengthening Human Capital Building & Enabling Infrastructure with activities prioritized to contribute to the objectives in NSDP II

### Implementation

- Integration of NSDP II into Medium-Term Fiscal Framework
- Monitoring and Evaluation and Policy Coordination
- Private Sector Engagement
- Financing Strategy
**The SCD Update (1/2)**

- **Development outcomes have not changed substantially since 2015:**
  - Most binding constraints identified in the first SCD remain valid but there has been slow progress in addressing them.

- **The weak development performance reflects gaps in implementation.** In most cases, the laws, policies and institutions that are meant to support the efficient and effective delivery of development outcomes exist. They are often not well implemented, or distorted:
  - In bridging implementation gaps, Lesotho has an opportunity to build new momentum on progress made in the recent past related to digitalization of government systems and strengthening inter-Ministerial and interagency coordination.
  - Improving public spending outcomes in service delivery, strengthened public investment management and rebalancing public investments to increase complementarity with private sector development.

**Focus areas for addressing development issues**

- **Rebalancing Growth:** Shifting to private investment and exports for job creation
- **Strengthening human capital** and improving service delivery especially in rural areas and lagging regions
- **Strengthening climate risk management and resilience**
Lesotho has the realizable potential of eliminating extreme poverty and boosting shared prosperity within a generation:

- South Africa provides Lesotho with access to markets and advanced infrastructure that create links with the rest of the world.

- Lesotho has access to international markets — including favorable trade preferences through the SACU, SADC, the Continental Free Trade Area, and the African Growth and Opportunity Act (AGOA) — which, if leveraged, could support export-led growth.

- The country has abundant water resources which, if better managed, could ensure reliability and quality of water supply services, and support economic growth and livelihoods.

- Demographic trends are favorable, with an increase in life expectancy and in the supply of working age people.

- The country enjoys significant financial and technical support from the development partner community.
<table>
<thead>
<tr>
<th>CPF Outcome</th>
<th>Achievements</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Focus Area I. Improving Efficiency and Effectiveness of the Public Sector</strong></td>
<td></td>
</tr>
</tbody>
</table>
| **Objective 1. Improve public sector and fiscal management** | - Public Sector Investment Plan completed for deriving the capital budget;  
- Strong expenditure management improvements (e.g., civil servant payrolls and beneficiary corrections in OAP). |
| **Objective 2. Improve the risk-responsiveness and equity of the social assistance system** | - The social assistance system (institutional framework, coverage, selection criteria and targeting) has significantly improved, thereby contributing to reducing inequality.  
- Large increase in the number of active mobile money accounts setting a solid foundation for shifting the payment system from cash to mobile payment. |
| **Objective 3. Improve basic education outcomes** | - Dropout rate of primary education improved slightly but was marginally worse for junior secondary education. |
| **Objective 4. Improve health outcomes** | - Moderate improvement in health outcomes, lagging its neighbors  
- Lesotho reacted fast and well on a COVID-19 preparedness & response plan  
- Little progress in contractual disputes around the QMMH. |
| **Focus Area II. Promoting Private Sector Jobs Creation** | |
| **Objective 5. Improve the Business Environment and Diversify the Economy** | - Major improvements in the business environment - both regulatory reforms and the use of digital technology.  
- The area under horticulture crops increased by five times in five years. |
- Productivity of tomatoes and cabbages increased by 21.3 percent between 2017 and 2020;  
- The number of beneficiaries who have adopted improved production technologies / farming practices in targeted areas increased from 234 in 2011 to 3,271 in 2020 |
| **Objective 7. Increase water and renewable energy supply for industrial and agriculture opportunities** | - The water and energy projects had late starts, but the water sector has already made substantial progress especially on the Metolong Dam and Water Supply Program. |
CLR for CPF FY2016-20
Lessons Learned

1. Maintain the contents of the CPF focus areas

2. Strengthen partnerships with government and other stakeholders for stronger program ownership, accountability.

3. Strengthen systematic and proactive portfolio management by adopting proven practices for targeting both project preparation and implementation issues.

4. Test results-based financing for enhanced focus on development results and outcomes.

5. Strengthen the new CPF Program Results Framework particularly related to realism of timeframes, result measurement, reporting, and evaluation for better program monitoring and engagement.

6. Build into the program mechanisms and flexibility for responding swiftly to unexpected adverse events.

7. Apply systematically a governance filter to better understand the local context and feasibility of programs.
3. Overview of WBG – Lesotho CPF FY2022-26

Results Chain Overview

**Government Priorities (NSDP2 2017-2023)**
- Enhancing inclusive and Sustainable Private Sector Growth and Job Creation
- Strengthening Human Capital
- Building Enabling Infrastructure

**Key Remaining Constraints (2021 SCD Update)**
- Weak business environment
- Lack of access to finance among MSMEs
- Poor human capital outcomes and service delivery among the poor and rural population
- High vulnerability to environment and economic shocks
- Weak financial resilience and gaps in social protection

**CPF Objectives**
1. Improved enabling environment for competitiveness
2. Increased opportunities and capabilities for MSMEs and entrepreneurs
3. Improved quality/retention of junior secondary education and quality of early childhood education
4. Strengthened quality of health delivery system for the poor and vulnerable
5. Improved effectiveness of the social protection system for poor and vulnerable people
6. Improved management of natural resources
7. Increased access to climate resilient infrastructure

**High-Level Outcomes**
- HLO 1. Increased employment in the private sector
- HLO 2. Improved human capital outcomes
- HLO 3. Improved climate resilience

**Vision**

**WBG Financing/Advisory/Analytics**
### Overview of WBG – Lesotho CPF FY2022-26

**Vision:** To support Lesotho in building a sustainable and resilient economy in a post-COVID environment by promoting a private sector driven, export-oriented economy for job creation supported by an enabling, efficient and effective public sector

<table>
<thead>
<tr>
<th>High-Level Outcomes</th>
<th>CPF Objectives</th>
<th>Foundational Issues</th>

</tr>
</thead>
</table>
| **HLO 1. Increased employment in the private sector** | 1. Improved enabling environment for competitiveness  
2. Increased opportunities and capabilities for MSMEs and entrepreneurs | • Governance and Government Capacity  
• Macroeconomic and Fiscal Sustainability | • Gender, digitalization and spatially-differentiated approach (lagging region approach) |
| **HLO 2. Improved human capital outcomes** | 3. Improved quality/retention of junior secondary education and quality of early childhood education  
4. Strengthened quality of health delivery system for the poor and vulnerable  
5. Improved effectiveness of the social protection system for poor and vulnerable people | | |
| **HLO 3. Improved climate resilience** | 6. Improved management of natural resources  
7. Increased access to climate resilient infrastructure | | |
What will we do differently in the next CPF?

Focus more on project implementation for impact through:

• applying lagging region approach with greater civic engagement.
• applying a political economy lens through a governance facility for project preparation and implementation.
• ensuring digital transformation across all HLOs.
• having an explicit focus on gender supported by the gender facility.
• stronger and integrated disaster risk / resilience approach.
• In addition, ongoing initiatives such as strengthening capacity and systems will continue.

Leverage success from the previous CPF implementation including:

• digital transformation (e.g., national ID).
• Prime minister’s delivery unit to accelerate private sector development.
• results-based financing (e.g., Social Assistance Project (IPF) using disbursement-linked indicators).

Using different instruments and approaches to overcome implementation bottlenecks, e.g.:

• Appropriate Instruments e.g., DLIs, PforRs and DPOs to support governance reforms
• Alternative supervision techniques (e.g., remote sensing, GEMs) to address risks associated with implementation in remote areas.
Implementing the FY2022-26 CPF Spatially-Differentiated / Lagging Region Approach to Address Disparities and Deepen Stakeholder Engagement

Global Lessons and Selected Country Experience
- Low economic concentration and heightened spatial inequalities are common.
- Many countries use Place Based Policies (agglomeration, equity and connectivity) to jump start growth in particular locations (e.g., Bhutan).
- The success of spatial “hardware” solutions such as special economic zones, large infrastructure and new cities hinges on development “software” that includes (e.g., entrepreneurial and human capital, government capabilities).

Lesotho’s Situation
- The number of poor and weak service delivery concentrate in mountain and rural areas (figures on the left).
- Productive activities outside Maseru and the urban centres are limited.
- The previous CPF focused on national-level systematic issues (e.g., social protection) and nation-wide project (e.g., SADP and SADP2) as well as development of industrial zones for private sector project (LREEAP and LWDP2).

What is Lesotho’s Spatial Approach
- Synergising World Bank-financed projects (e.g., health, education, infrastructure) at selected geographical areas with high number of poor and weak service delivery.
- Expected results include
  - **Efficiency gain**. Spatial targeting could be more efficient to accelerate geographical development.
  - **Synergies** between World Bank-financed projects and beyond.
  - **Citizen engagement** especially with stakeholders
  - **Delinking with politics** especially around the next general election in Sep 2022.
  - **Complementarity** with the previous CPF focusing on national-level systematic issues

How to Implement it in Lesotho
- Starting with pilot for limited number of geographical areas for pilot.
- Constructing a selectivity filter building on a spatial subnational Project Targeting Index (PTI) piloted in 2019-2020.
- Using GEMS for government M&E and stakeholder engagement.
- Collaborating with other development partners with ground experience (e.g., IOM).
- Engaging with local governments and beneficiaries.

Risks
- Weak legal and policy framework for decentralization.
- Capacity constraints and data availability/quality at the local level.
- Political influence on the selection of targeted areas.
- Transaction costs to implement a project (e.g., COVID related restrictions).

Mitigation Measures
- Clear and transparent criterial for spatial targeting through a selectivity filter.
- Collaboration with other development partners to ensure synergies and reduce transaction costs.
- Capacity building (e.g., fiscal decentralization through the PER)
